## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-14 are drawn to a seamed article with sealed laminate panels, classified in class 2, subclass 275
  - II. Claim 15 is drawn to method of joining laminate by skiving and sealing to form a impermeable seam , classified in class 428, subclass 57.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are structurally unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case invention I pertains to a garment having a seamed article with sealed laminate panels classified in 2/275, while invention II pertains to method of joining laminate by skiving and sealing to form a impermeable seam classified in 428/57.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
